PROFESSIONAL SUMMARY

A versatile B.Tech student in Electrical and Computer Engineering with a strong focus on Data Science and Analytics. Expert in architecting end-to-end data pipelines and designing interactive dashboards using Python, SQL, Power BI, and Tableau. Proven problem-solver with 960+ algorithmic challenges solved, combining technical agility with machine learning expertise to drive data-informed decisions in AI-driven roles.

EDUCATION

B.Tech in Electrical and computer Engineering (AKTU)	Sep 2023 – Nov 2027
ABES Engineering College	CGPA-8.17
Class 12th (ISC)	2022
ModernAcademySenior Secondary School	83%
Class 10th (ISCE)	2020
ModernAcademySenior Secondary School	76%

Technical Skills

- **Programming Languages:** Python (primary), R, SQL, C, C++, and Java.
- **Machine Learning:** Regression (Linear, Polynomial, SVR), Classification (K-NN, SVM, Naive Bayes), Clustering (K-Means), and Association Rule Learning.
- **Deep Learning & AI:** Artificial Neural Networks (ANN), Convolutional Neural Networks (CNN), Natural Language Processing (NLP), Reinforcement Learning.
- **Data Analysis & Libraries:** Pandas, NumPy, Matplotlib, Seaborn, Scikit-learn, TensorFlow, PyTorch.
- **Model Optimization:** k-fold Cross Validation, Grid Search, XGBoost, Dimensionality Reduction (PCA, LDA).
- **BI & Visualization:** Power BI, Tableau, Advanced Excel
- **Databases & Querying:** MySQL, Microsoft SQL Server, SQLite, Google BigQuery
- **Cloud & Tools:** AWS, Azure, Snowflake, Git, Jupyter Notebooks, VS Code

PROJECTS

MACHINE LEARNING PROJECTS

Algerian Forest Fire Predictor | Python, Flask, AWS Elastic Beanstalk [\[GitHub Repo\]](#)

- Architected a predictive web application to forecast the Fire Weather Index (FWI) using Ridge Regression based on regional meteorological data.
- Integrated a Flask-based web interface with Bootstrap 5 to deliver a modern, responsive user experience for environmental monitoring.
- Successfully deployed the full-stack application on AWS Elastic Beanstalk, ensuring high availability and automated scaling.

Sentinel-AI: Real-Time Fraud Mitigation Engine | Python, AWS, Docker [\[GitHub Repo\]](#)

- Spearheaded a financial fraud detection system utilizing Cost-Sensitive Logistic Regression to maximize fraud recall in highly imbalanced (98:2) datasets.
- Optimized decision boundaries from 0.5 to 0.22, achieving a 35% increase in detection sensitivity and a final Fraud Recall of ~90%.
- Deployed the serialized model engine on AWS EC2 using Docker, providing a scalable endpoint for real-time transaction scoring.

VitalGuard AI: Smart Patient Triage System | Python, Scikit-Learn, Streamlit [\[GitHub Repo\]](#)

- Developed an Explainable AI (XAI) solution using Decision Tree Classifiers to provide real-time clinical risk assessments based on metabolic vitals.
- Engineered a Glassmorphic UI dashboard featuring live risk calculations and clinical benchmarking via Plotly visualizations.
- Prioritized model interpretability by limiting tree depth and highlighting key clinical branching points (Glucose, BMI) to ensure transparency for medical professionals.

DATA ANALYTICS PROJECTS

E-commerce Sales Analysis Dashboard (Power BI, DAX) [\[GitHub Repo\]](#) [\[Live Dashboard Link\]](#)

- Architected an interactive Power BI dashboard to analyze overall e-commerce performance, focusing on product popularity, regional sales distribution, and promotional effectiveness.
- Engineered complex data models utilizing Power Query and advanced DAX measures (CALCULATE, USERELATIONSHIP) to enable dynamic period-over-period comparisons and granular drill-down capabilities.
- Analyzed \$122M in total sales data to uncover a consistent 10% profit margin, identify top-performing electronic revenue drivers, and strategically evaluate the financial impact of targeted marketing campaigns.

Superstore Sales Analytics (Tableau) [\[GitHub Repo\]](#) [\[Live Dashboard\]](#)

- Designed a comprehensive, multi-page Tableau dashboard integrating multiple datasets to monitor cross-functional business performance across sales, products, shipping, and customer returns.
- Formulated complex data relationships and calculated fields to track dynamic KPIs, leveraging dual-axis charts, interactive maps, and scatter plots to visualize seasonal trends and product profitability.
- Analyzed \$2.3M in total sales yielding \$286.4K in profit, successfully isolating key regional markets, pinpointing a 5.91% return rate, and identifying structural profitability issues for inventory optimization.

SQL-Powered Sales Data Workflow (SQL, Python) [\[GitHub Repo\]](#)

- Spearheaded an end-to-end data pipeline utilizing SQLite and Python, programmatically generating, ingesting, and wrangling 150+ sales records using the Pandas library (to_sql).
 - Executed advanced analytical SQL queries—implementing complex aggregations (SUM, GROUP BY), temporal data extractions (strftime), and ranking filters (ORDER BY, LIMIT)—to evaluate monthly seasonality and regional contributions.
 - Transformed raw database query results into actionable business intelligence visualizations leveraging Matplotlib and Seaborn, providing clear insights into top-grossing products to optimize inventory strategy and marketing spend.
-

CERTIFICATES

- **Complete Data Analyst Bootcamp from Basics to Advanced** (Udemy) | [\[View Certificate\]](#)
 - **The Ultimate MySQL Bootcamp: Go from SQL Beginner to Expert** (Udemy) | [\[View Certificate\]](#)
 - **Machine Learning A-Z, AI, Python & R + ChatGPT Prize by Udemy** [\[View Certificate\]](#)
 - **Prompt Engineering** (IBM) [\[View Certificate\]](#)
 - **Python** (CISCO) [\[View Certificate\]](#)
-

ACHIEVEMENT

- **Achieved Finalist position** in **Hackamania Hackathon (Microsoft Azure Supported)**, The Elites, 2025
 - **Selected as Finalist** in **Hack Genesis 125 (International Hackathon)**, CHRIST University, 1025
-

EXTRACURRICULAR

- **Design & Branding:** Enhanced student club engagement by utilizing Canva and Figma to design compelling visual templates and promotional materials.
- **Creative Pursuits:** Actively engage in sketching, painting, and playing the guitar as creative outlets, alongside writing original poetry during free time.
